

Please continue the regulation and limitations on Broadcast ownership. I believe that media ownership policies should support freedom of speech, promote diversity and localism. The charter of the Federal Communications Commission is to ensure that communications policy is managed for the public interest, and not merely for private profits. I do not consider the proposals to relax media ownership limits in the public interest.

In addition, the previous relaxing of regulation has resulted in a poorer-informed populace with less diversity and impartiality in reporting.

Thank you for your time and I urge serious consideration of these matters.
